

M2 Guest to Customer Auto Signup

User Manual and User Guide

Overview

Magento 2 Guest to Customer Auto Signup extension is used for the Auto Account Creation while Guest Checkout.

When there are no passwords or registration requirements, buyers will quickly fill in and finish checkout in only one step. Magento2 Guest to Customer Auto Signup is a unique and effective solution for any e-commerce store. The feature will take the store's shopping experience to another level and increase the goal conversion rate. This extension creates a customer account automatically when checkout as a Guest.

Auto Assign old order to the newly created customer account

Installation Guide

1. From the Zip file

- Unzip the zip file in ``app/code/``
- Enable the module by running ``php bin/magento module:enable Tech9logy_GuestToCustomer``
- Apply database updates by running ``php bin/magento setup:upgrade``
- Flush the cache by running ``php bin/magento cache:flush``

2. Using Composer

- Make the module available in a composer repository for example:
 - private repository `repo.magento.com`
 - public repository `packagist.org`
 - public github repository as vcs
- Add the composer repository to the configuration by running `composer config repositories.repo.magento.com composer https://repo.magento.com/`
- Install the module composer by running `composer require tech9logy/module-guesttocustomer`
- enable the module by running `php bin/magento module:enable Tech9logy_GuestToCustomer`
- apply database updates by running `php bin/magento setup:upgrade`
- Flush the cache by running `php bin/magento cache:flush`
